DIABETES IN THE U.S

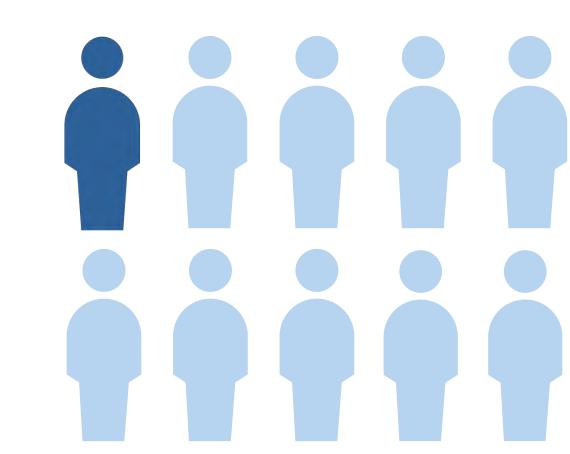

A US REPORT CARD

38 million people have diabetes

DIABETES

That's about **1 in every 10** people

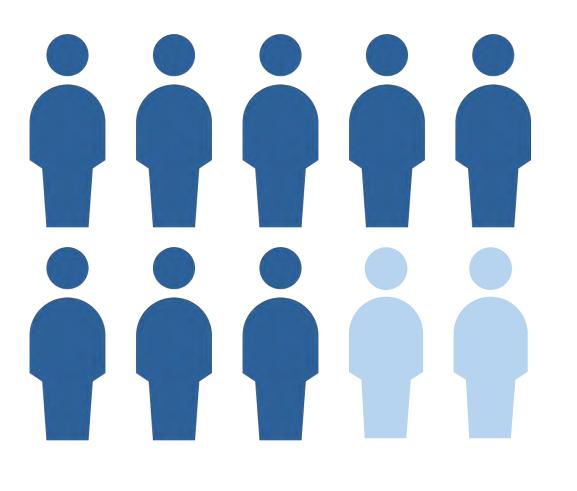

1 in 5 people don't know they have it

PREDIABETES

98 million American adults—more than 1 in 3 —have prediabetes

More than 8 in 10

adults with prediabetes don't know they have it

\$413 Billion

Total medical costs & lost work & wages for people with diagnosed diabetes

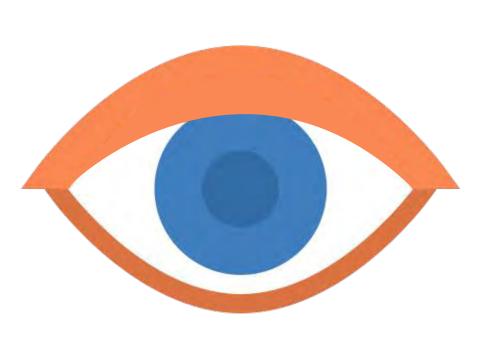

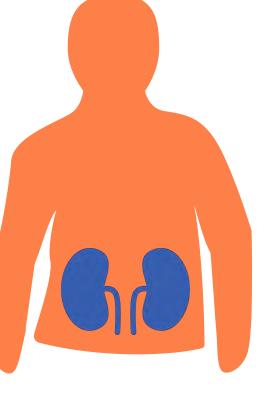

Medical costs for people with diabetes are more than twice as high as for people without diabetes

RISKS

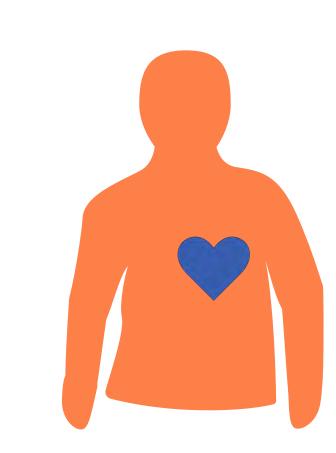

People who have diabetes are at higher risk of serious health complications:

Blindness

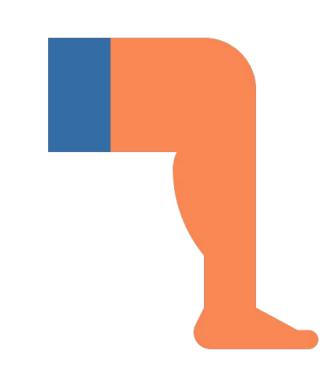

Kidney failure

Heart disease

Stroke

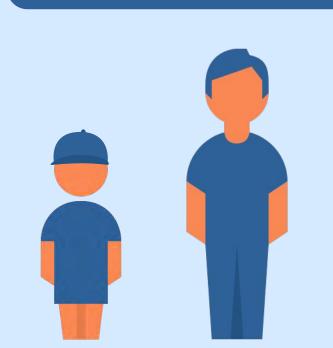

Loss of toes, feet, or legs

COMMON TYPES OF DIABETES

TYPE 1

Body doesn't make enough insulin

Can develop at any age

No known way to prevent it

In adults, type 1 diabetes

accounts for approximately

5-10% of all diagnosed

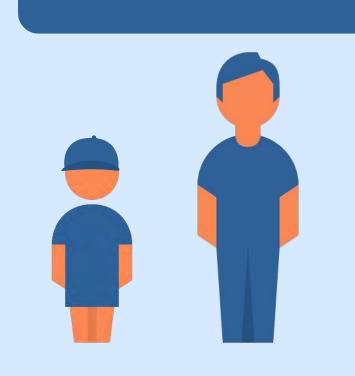

cases of diabetes.

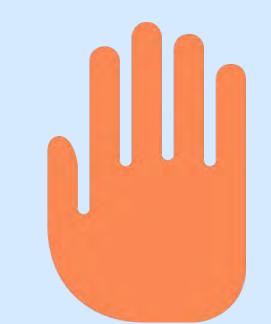

Just over 18,000 youth diagnosed each year in 2014 and 2015

TYPE 2

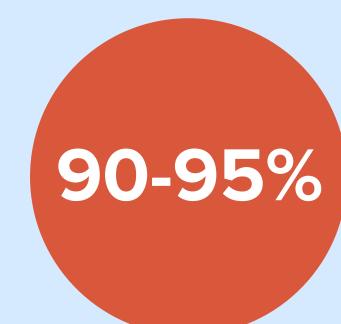

Body can't use insulin properly

Can develop at any age

Most cases can be prevented

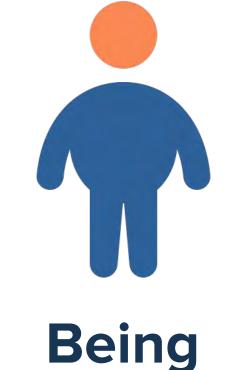

In adults, type 2 diabetes accounts for approximately 90-95% of all diagnosed cases of diabetes.

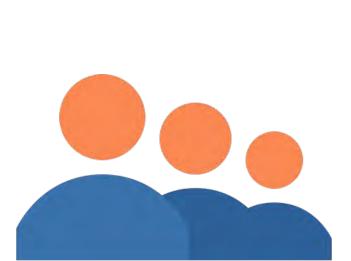

Nearly 6,000 youth diagnosed each year in 2014 and 2015

Risk factors for type 2 diabetes:

overweight

REFERENCES

Having a family history

Being physically inactive

Being 45 or older

1.2 Million

People 18 years or older diagnosed with diabetes in 2021
